Metropolis Activation Code is website and content management software that allows you to define your page layout once, and start adding pages without ever again having to worry about how the page looks. Metropolis is website management software without silly limits (no, 2 billion pages does not count as a silly limit. And no, nor does processing 'only' 10,000 pages per minute.) Metropolis is website management software that runs rings around similar products like CityDesk, by being between a few hundred and several thousand times faster, and, thanks to its inbuilt scripting language "MetroScript", infinitely more powerful. MetroScript is a full blown scripting language, based on RealBasic's RBScript, that can be used in a php-like syntax in your templates. Metropolis comes standard in these languages: Chinese (Mandarin), Croatian, Danish, Dutch, English, Estonian, German, Finnish, Flemish, French, Italian, Polish, Spanish. Limitations: □ 30 days trial TrainerView \$25.00 Download TrainerViews trainer add-on. TrainerView will add a small "TrainerViews" togglebutton to the top right of a Shopify, WordPress, or Prestashop storefront, where you can show/hide the additional information, such as the options for the platforms. You have the options to show "Yes, I want this and that" and "No, I dont want that and this". Or something similar. A small and light add-on which will add some colors to the rest of the shop without adding any kind of functionality. Why do I like this add-on: It works everywhere, including smartphones, it is almost invisible, it adds minimal size to the view, it can be toggled on and off... Limitations: It just has colors. This add-on has only colors. TrainerView is \$25.00 Zeekin \$12.00 Download Zeekin's main application. Zeekin is a small desktop application that allows you to run a fully working "Choose and buy" web shop on your own servers or even in your own virtual private servers. A small app that helps you achieve a fully functional "Choose and buy" web shop. All without any kind of complexity. The app is a cross platform multi-language HTML/CSS/Javascript editor with limited support for styling. Why do I
